Suyog Kulkarni

Platform Engineer — DevOps Engineer — Azure & AWS — Kubernetes (AKS/EKS)

+91-7020301783 — iamsuyogkulkarni@gmail.com — linkedin.com/in/suyog-kulkarni0

Summary — Platform and DevOps Engineer with 4+ years of experience building and operating cloud-native platforms on Azure and AWS. Currently a Platform Engineer at Xoriant supporting NICE's NTRX product on AKS, with prior experience at Persistent Systems on IBM DB2 (Kubernetes) and GoDaddy (Ansible) engagements. Strong in Kubernetes, Docker, Terraform, Helm, Jenkins and CI/CD automation, observability (Prometheus, Grafana) and Python (Django, React). AWS Certified Developer Associate, AWS Certified Cloud Practitioner and Microsoft Azure Fundamentals (AZ-900).

Skills

- **Cloud Platforms:** Microsoft Azure (AKS, Azure Container Registry, Azure DevOps, Azure Monitor, Key Vault, VNet), AWS (EC2, S3, EKS, IAM)
- **Containers & Orchestration:** Kubernetes, AKS, EKS, Docker, Helm
- **DevOps & Automation:** Jenkins, Azure DevOps Pipelines, GitHub Actions, SonarQube, Ansible, Terraform, CI/CD Pipelines
- **Monitoring & Observability:** Prometheus, Grafana, Azure Monitor, Alerting, Logging
- **Programming:** Python, Bash, JavaScript, Java, SQL, Django, React
- **Testing & Build:** Pytest, Unit Testing, TDD, Maven, Gradle
- **Tools & Practices:** Git, GitHub, Jira, Agile/Scrum, Infrastructure as Code, High Availability, Incident Management

Experience

Platform Engineer **Xoriant, Pune (Jan 2026 – Present)**
Client Product: NICE NTRX

- Work as a Platform Engineer on NICE's NTRX product, operating and enhancing the platform across Microsoft Azure and AWS environments.
- Manage and maintain Azure Kubernetes Service (AKS) clusters, including node pools, scaling, upgrades, networking and workload deployments.
- Build and maintain CI/CD pipelines for automated build, test and deployment of NTRX services to Kubernetes environments.
- Provision and manage cloud infrastructure as code with Terraform and package deployments with Helm for consistent releases across environments.
- Improve platform reliability and observability with monitoring, alerting and logging for containerized workloads.
- Troubleshoot production issues across cloud, Kubernetes and application layers, and collaborate with development, QA and SRE teams on root-cause analysis.
- Apply cloud security and access best practices, including RBAC, secrets management and least-privilege access on Azure and AWS.

DevOps Engineer (Kubernetes + Python) **Persistent Systems Ltd., Pune (Feb 2025 – Dec 2025)**
Senior Software Engineer — Client: IBM

- Maintained high availability of IBM DB2 databases on Kubernetes clusters, achieving 99.09% uptime and 35% less downtime through automated pod recovery.
- Built Jenkins and SonarQube CI/CD pipelines for Docker deployments, cutting deployment time by 60%.
- Developed a Django–React Incident Management Dashboard that improved incident response time by 40%, with Prometheus-Grafana monitoring and alerting.

DevOps Automation Engineer (Ansible + Python) **Persistent Systems Ltd., Nagpur (Jul 2022 – Jan 2025)**
Software Engineer — Client: GoDaddy.com

- Led automation for a large-scale platform migration moving customer websites and hosting environments from GoDaddy's OH platform to the V3 platform.
- Developed Ansible playbooks and reusable roles to provision and configure hundreds of web servers, including Nginx, PHP and MySQL stacks, improving release efficiency by 40%.
- Wrote and refactored Python migration scripts for server configuration, hosted content and database transfer, achieving 30% higher uptime.
- Integrated Jenkins with Ansible for one-click, multi-environment deployments with health checks and automated rollback.
- Used Ansible inventories to run migrations in controlled batches, with automated logging and reporting for each batch.

- Built validation checks and test websites to verify configuration, DNS, SSL, performance and functional parity before DNS cutover.
- Collaborated with QA to debug discrepancies, and documented migration workflows, testing procedures and rollback strategies.

Projects

NICE NTRX Platform Engineering (Azure + AWS) **Jan 2026 – Present**

- Operate NTRX workloads on AKS with automated deployments, scaling and environment consistency using Helm and Terraform.
- Maintain CI/CD pipelines and cloud resources across Azure and AWS to support reliable, repeatable releases.
- Strengthen monitoring, alerting and incident troubleshooting for production Kubernetes workloads.

GoDaddy OH to V3 Migration – Ansible + Python **Jul 2022 – Jan 2025**

- Developed Ansible playbooks and reusable roles to provision and configure hundreds of web servers, including Nginx, PHP and MySQL stacks, with inventory-based migration batches.
- Wrote Python scripts for content and database transfer, URL, DNS and SSL validation, and configuration comparison before DNS cutover.
- Integrated Ansible and Python with Jenkins for one-click environment setup, automated reporting, health checks and rollback on failure.
- **Outcome:** 40% better release efficiency, 30% higher uptime and less manual intervention in migration runs.

IBM DB2 on Kubernetes – DevOps + Python **Feb 2025 – Dec 2025**

- **Problem:** DB2 services moved to Kubernetes suffered manual pod restarts, inconsistent deployments across environments and fragmented monitoring.
- **Kubernetes & Docker:** Tuned resource allocation, created Helm charts for all environments and automated self-healing pod workflows.
- **CI/CD:** Built Jenkins pipelines with Docker builds, SonarQube analysis, Pytest execution and Kubernetes rollouts, plus rollback strategies and environment-specific variables.
- **Dashboard:** Django REST API backend and React frontend for incident CRUD, Grafana alert ingestion, live status, SLA tracking and severity-based escalation.
- **Outcome:** 99.09% uptime, 34% less manual intervention, 40% faster incident response and 60% shorter deployment time.

Education

Bachelor of Engineering in Information Technology **2019 – 2022**
St. Vincent Pallotti College of Engineering & Technology, Nagpur *CGPA: 9.1/10*

Diploma in Computer Engineering **2017 – 2019**
Government Polytechnic Nagpur *Percentage: 86.92%*

Secondary School Certificate **2015 – 2016**
Khandelwal English High School, Akola *Percentage: 89.80%*

Certifications

- AWS Certified Developer – Associate
- AWS Certified Cloud Practitioner
- Microsoft Certified: Azure Fundamentals (AZ-900)
- Persistent Systems – Certified DevOps Engineer
